Reminder: Install
Fusion if you
haven't already.

TODAY'S LAB

Vinyl Cutter Demo

Useless Box: Design and Cut Box
Walls Out of Cardboard

Work on the Assignment:
Create Your Materials Box

Fusion Tutorials

3D Model 2 Objects

Cut Something on the Vinyl Cutter

1

VINYL CUTTER

2

LAB PROJECT:

BUILD A USELESS BOX

OVER THE NEXT FEW WEEKS WE WILL BUILD

A USELESS BOX

Week 2

Design and 2D
Cut Box Walls

Week 3

Make Bottom
of the Box with
Handtools

Week 4

Program the
Servos

Week 5

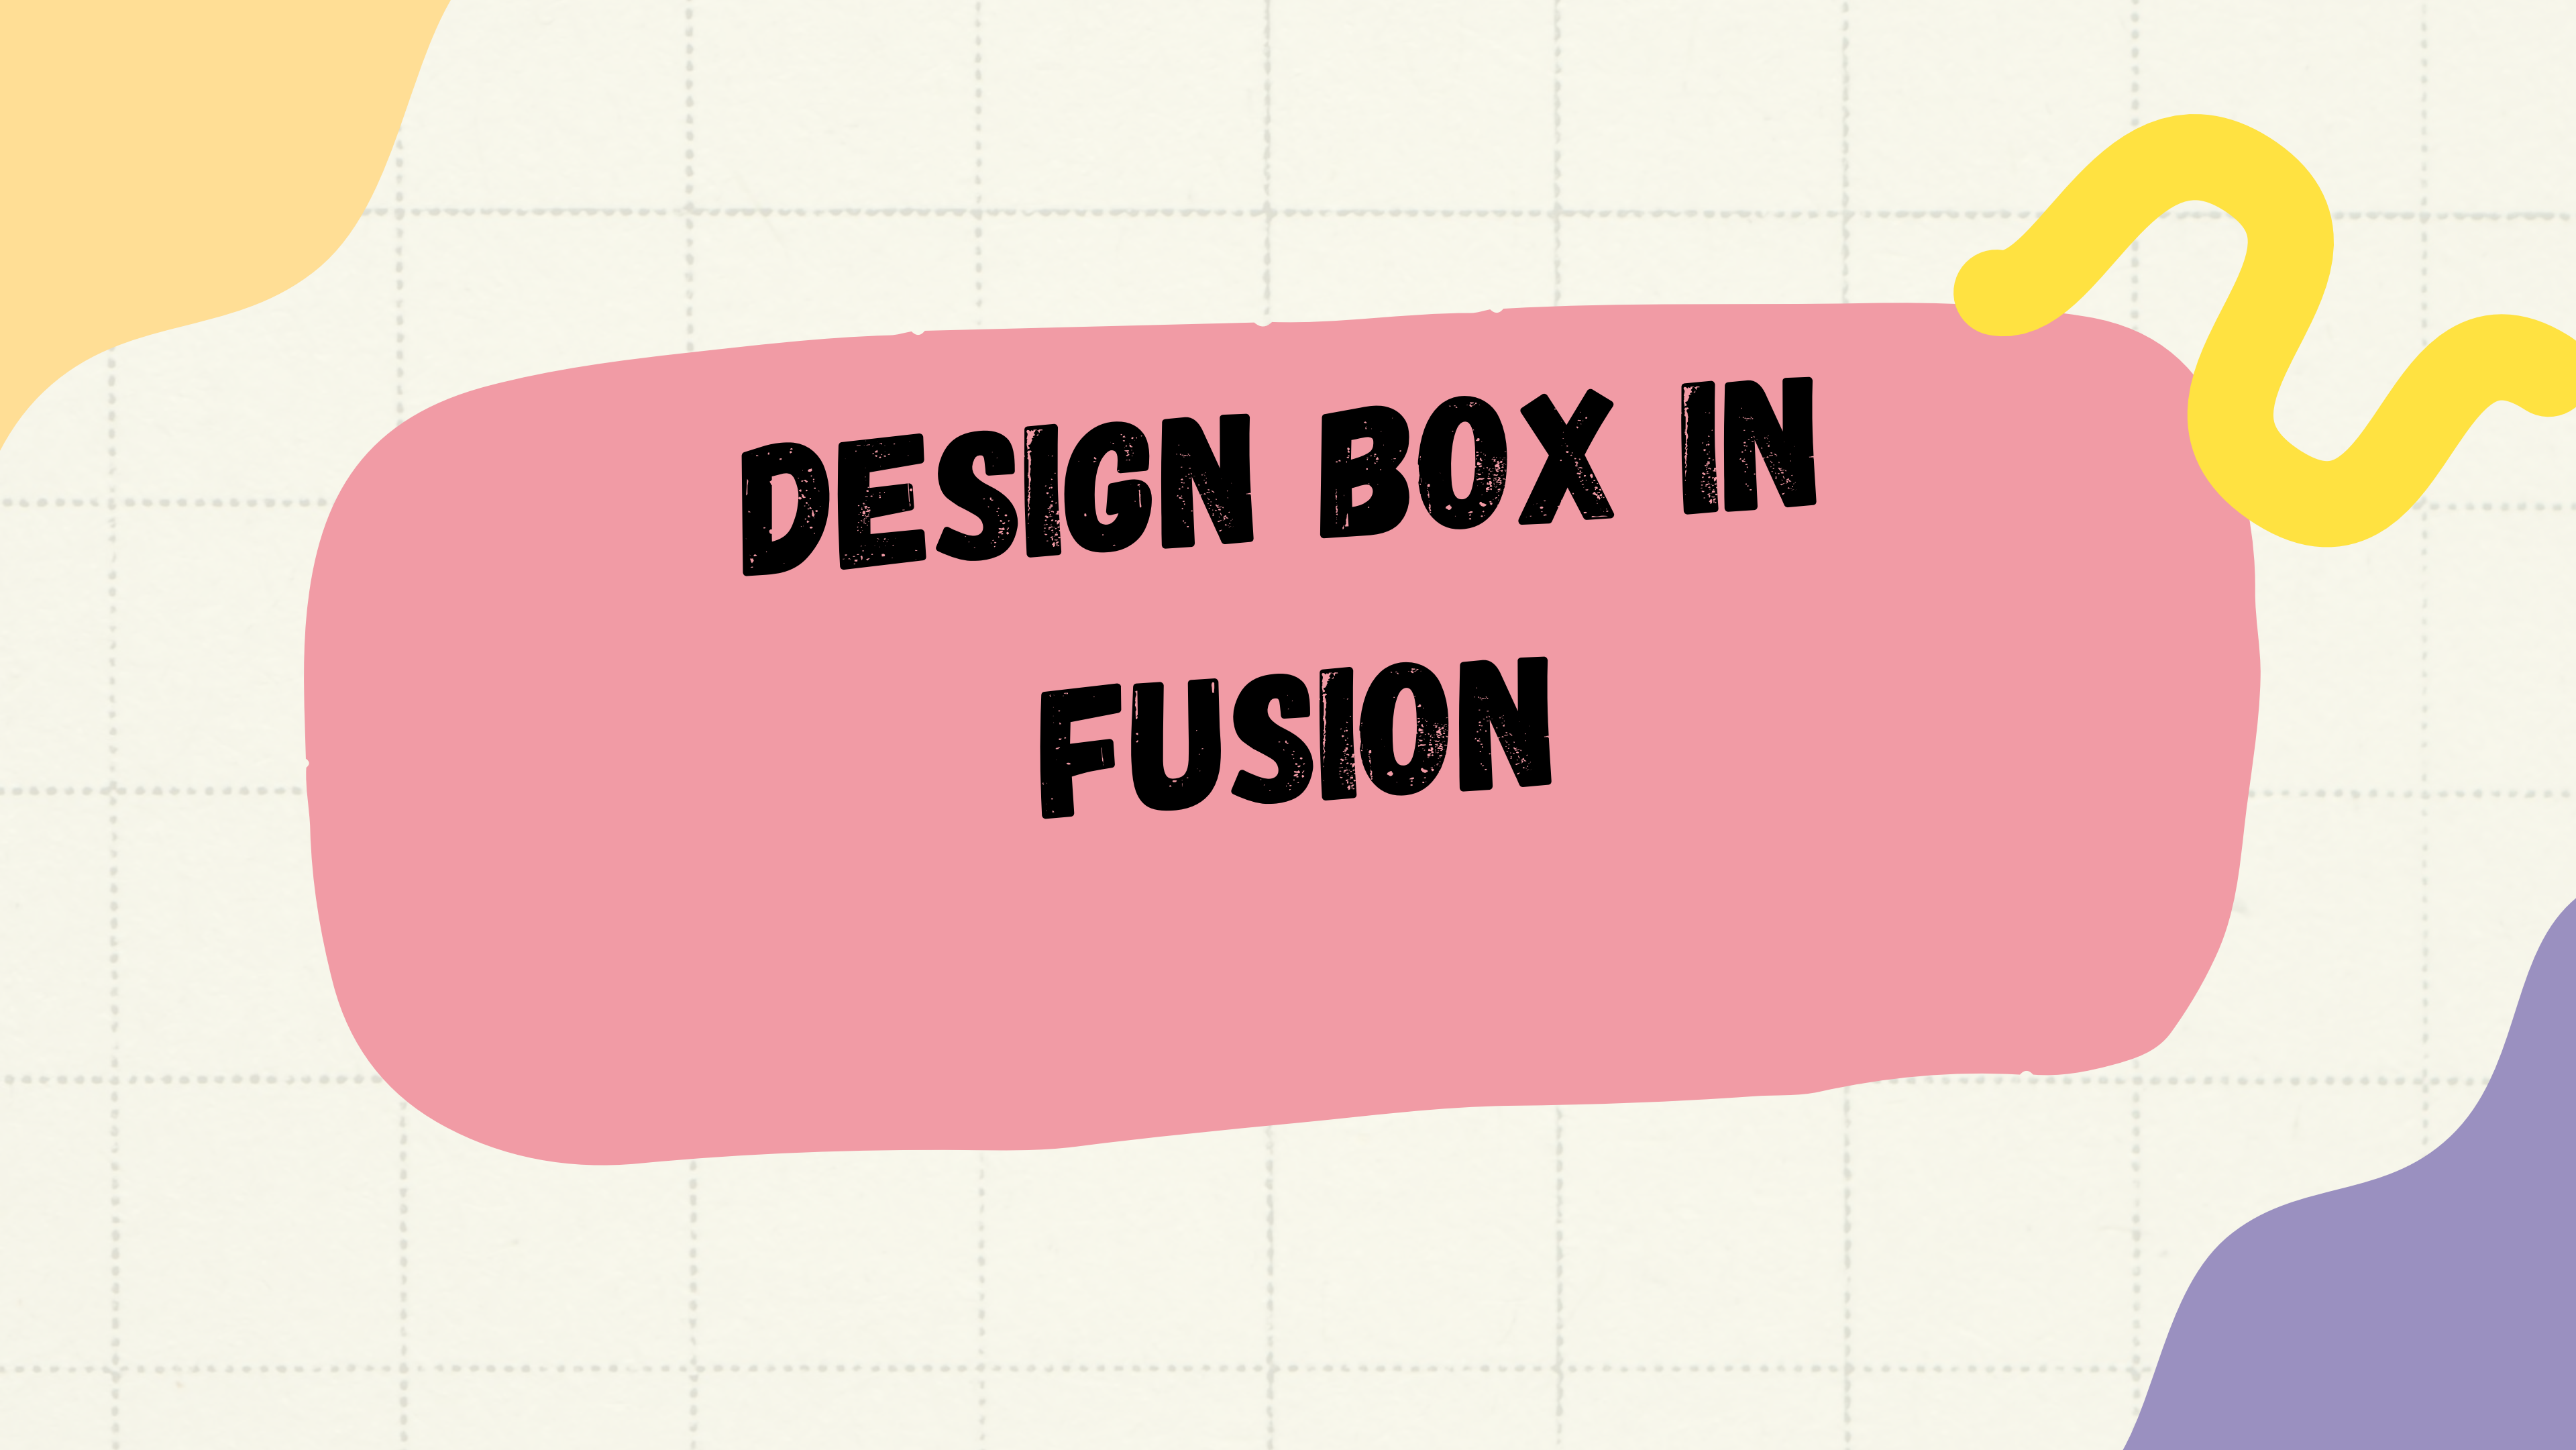

3D Print the
Servo Holder

Week 6

Program a
Switch to Open
the Box

DESIGN BOX IN FUSION

DESIGN BOX IN FUSION360: FRONT PANEL

boxFront_Length= 91mm

cardboardThickness
= 4mm

screwSlot_Height
= 12mm

screwSlot_Width = 3mm

box_Height
= 30mm

-50

-25

screwNut_Width = 5mm

screwNut_dist2bottom
= 2.5mm

screwNut_Height=2.2mm

DESIGN BOX IN FUSION360: EXTRUDE FRONT PANEL

DESIGN BOX IN FUSION360: LEFT PANEL

DESIGN BOX IN FUSION360: EXTRUDE LEFT PANEL

DESIGN BOX IN FUSION360: EXTRUDE (WITH AN OFFSET) FRONT PANEL SKETCH WITHOUT TOP SCREW SLOT TO MAKE BACK PANEL

DESIGN BOX IN FUSION360: EXTRUDE (WITH AN OFFSET) LEFT PANEL SKETCH WITHOUT WIRE OUTPUT HOLE TO MAKE RIGHT PANEL

DESIGN BOX IN FUSION360: LID

DESIGN BOX IN FUSION360: FULL BOX IN 3D

DESIGN BOX IN FUSION360: EXTRUDE RIGHT SIDE OF FRONT PANEL TO CLOSE THE BOX

TO PUT THE BOX IN 2D, WE NEED TO 'UNWRAP' THE BOX. WE WILL DO THIS USING JOINT RELATIONSHIPS IN FUSION

REMEMBER: DO NOT File->Export DXF

Right Click on the Sketch and Save as DXF

**Take it to Rhino to put things in the
Cut Layer and Score Layer**

Rhino Commands
Explode: Disconnect all line segments
SelDup: Select duplicate lines

LASER CUTTER

Check Settings to make sure the right material is selected and thickness is correct. Don't assume everyone is cutting cardboard!

Use material wisely. Try to minimize wasted material.

Stay by laser cutter to make sure there is no sustained fire.

Have a buddy!
